

When you look closely at our reporting solutions . . .

there is no comparison!

DashboardGear™

Whether you are looking to report on your Lawson Financial or Human Resources data, Dashboard Gear has a solution. The Dashboard Gear Toolkits expose your Lawson data to all of your reporting tools.

Many people spend days creating a single report using their Lawson Financial data or Human Resource information. Our solution significantly reduces the time it takes to build reports, run queries, and analyze your financial or human resource data. Our Toolkits create a star schema data mart, an OLAP Cube, common reporting views, and a number of denormalized relational tables which are optimized for easy report creation from your Lawson General Ledger or Human Resource data.
