

Solutions that make reporting and analyzing Lawson data easier!

Dashboard Gear, an approved Lawson product partner, specializes in reporting and analytic solutions for the Lawson marketplace. We currently offer **financial** and **human resources/payroll** reporting solutions that simplify the reporting process, significantly reducing the time it takes to create reports and dashboards on Lawson data. Whether you are using LBI, Business Objects, Cognos, Excel, or any other Business Intelligence (BI) tool, our solutions unlock the full potential of your Lawson investment.

There are three layers in a typical Business Intelligence implementation: the data layer, the content creation layer and the distribution layer. Dashboard Gear enhances the data layer by creating a **reporting data mart** from your Lawson production data.

Dashboard Gear's comprehensive reporting data marts include:

- ✓ A Relational Reporting Database
- ✓ A Star Schema Data Mart
- ✓ Microsoft Analysis Services OLAP Cubes
- ✓ Managed Common Views against Lawson data

Dashboard Gear's reporting data marts provide these business benefits:

- ✓ Low cost of ownership – fast return on investment
- ✓ Quick implementation – less than a week
- ✓ Ease of use – report creation in minutes, not days
- ✓ Personalized configuration
- ✓ Custom tables and metrics
- ✓ Reporting tool independence
- ✓ Integration with LBI

We invite you to find out why many Lawson clients have already chosen Dashboard Gear's reporting and analytical solutions to help unlock the full potential of their investment in Lawson Software.
